Tank Order No. 1 Contrast No. 602

SCHEDULE

SCOPE OF WORK:

Under this Tesk Order No. 1 the Contractor shall furnish the necessary naterial and services for the 1 tests as described here-under:

- 1. One (1) each S-E Fortable Tage Recorder
- 2. One (1) each S-S Fortable Tape Recorder
- 3. One (1) each S-H Portable Tage Recorder No. 3

SPICIFICATIONS:

1. Items 1 through 3 shows shall be constructed and furnished in accordance with the technical provisions of Contractor's letter dated 23 January 1958, as modified by Contractor's Proposal, dated Pebruary 27, 1958, as amplified by the Addamson horomater:

ADDEDEDUM:

10B-12

Item 1. Portable Tage Recorder/Reproducer No. 1

One (1) unit required Input power 6 volts (Positive terminal grounded) For use with a inch magnetic tage on standard 5 inch reals Tage apped 30 inches per second Three track record head Three track monitor/playback head Truck width 0.040 inches (40 mils) Hend spacing 0.100 inches (100 mils) center to center Cross talk between heads at least 40 & down at maximum record level Three record emplifiers: input imposance to accept a signal of 0.7 volts RMS seroes 2100 ches for normal record level Three monitor/playbeck emplifiers: output impedence 1000 ohme, CER level maximum, with serew driver adjustable output level control for each emplifier Frequency response 250 cgs to 60 KC / 6b internal 50 MC crystal controlled reference cecillator (accuracy 1 part in 10,000), the output of which is to be automatically recorded on the center track in addi-

CONFIDENTIAL

tion to am external signal.

CONFIGENTIAL

No ermon bond

Bias frequency 250 KC

The tope transport must be equipped with a three phase equated drive motor powered by a power emplifier with orystal or tuning fork control; assumer, one part in 2000. Flatter and now not to exceed 0.5% peak to peak the tape transport shall have provisions for revind the tape transport shall be equipped to peak fast start and stop by interrupting the 6 volt power. (Solamoid controlled expeten idler and braking system to prevent tape oversum after turn off).

The tage transport shall not require more than 4 amperes of correct at 6 volts except for initial start and stop current

All signal imput and output jacks and the amplifier power imput jack are to be REC changes competers.

The tape transport power and control connector shall be an Amphanol receptible type 165, with connections as follows: Pin A - no connection, Pin B - Chassis ground, Pin C - Power off, Pin D - power on, and Pin E - POS 6 volts

The recorder shall be required to operate over an embient temperature range of from -200 to \$500 C.

The recorder shall be mounted in a magnesium or aluminum case of rugsed design, acceptable to the purchasing agency, with dimensions not to esseed 9 x 5 x 12 inches and the entire recorder must be constructed to stand the shock and vibration required of mobile equipment. The electronics in this unit must be transistorised through-

out, including the three phone power emplifier.

Item 2. Porteble Tage Recorder/Reproducer No. 2

Come (1) unit required

For use with & inch ampostic tape on standard reals up to

100 inches in dismeter

Tape speed 30 inches per second

Three track record head

Three track menitor/playback head

Track width 0.000 inches (80 mile)

Head spacing 0.100 inches (100 mile) center to center

Cross talk between heads to be at least 80 IB down at

maximum record level

Three record amplifiers: input impedance of track 1 and 3, to accept a 1 volt RMB signal across 1000 chms, track 2 (centur) must have two inputs, one for microphone (microphone to be furnished by the contractor) and one for an external reference tone, 120 6 volts peak to peak

The microphone must be equipped with a push to talk microphone outout switch

Three momitor/playback amplifiers: output impedance OSB at 1000 chas

A monitor phone jack must be provided and a 6 position switch, to switch the monitor between the three record and three playback amplifiers

Frequency response 250 ops - 60 KC /6 &

Bias frequency 250 KC

No erese head

The tage transport must be equipped with a three phase capatan drive motor, powered by a power amplifier with crystal or tuning fork control; ascuracy 1 part in 2000. Flutter and wow not to enseed 0.5% peak to peak

Provisions for revind

The tape transport must be equipped to permit remote start-stop by Solemaid control. (Solemaid control of capetan idler and braking system to provide fast start and stop and prevent tape overrum after turn off).

All signal input and output Jacks, except phone and microphone connectors, to be BHC chassis connectors
The recorder-reproducer must operate from, and have provisions for adjusting to, the existing line voltage, within
the limits of 70 to 270 volts 50 to 460 cycles per second
The recorder shall be required to operate over an ambient
temperature range of from -10° to /50° C.

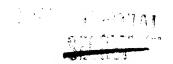

The recorder-reproducer must be manufed in a magnesium or aluminum, portable case with dimensions of $72 \times 72 \times 18$ qualitations. The case shall be of regard design, acceptable to the purchasing agency, and the entire recorder must be constructed to stand the shock and vibration required of mobile equipment

A bracket must be included for mounting the recorder in a standard 19 inch communications rack. (Serous for mounting the recorder in the portable case must be the same size as those used in a standard 19 inch rack). $0 \text{ K} \sim 14$

Item 3. Portable tape Recorder/Reproducer No. 3

One (1) unit required
For use with a inch ammetic tape on standard 5 inch reels
Tape speed 79 inches per second

CONFIDENTIAL

Single track (Full track) record Single track munitor/playback head Self-powered; Battery included Recorder-Reproducer shall be mounted in a case not to exceed 9 x 5 x 12 inches Frequency response 50-10,000 eps / 18 Input impedance of record amplifier, 50 chas The tape transport must be equipped for remote start-stop Output impedance of the playback amplifier 1000 chas at ODB level The tape transport must be equipped with a three-phase espetan drive motor, powered by a power amplifier with exystal or tuning fork control, accuracy 1 part in 2000 Kiarophone to be furnished by contractor The recorder shall be required to operate over an ashimat temperature sampe of from -100 to /500 C. This unit can be a standard Model MB, modified to employ the three phase expeten drive motor and power emplifier. The unit must be transistorised throughout including the three phase power amplifier

Specifications as covered by Contenetor's letter and proposal as stated above are incorporated herein by reference and made a part hereof.

DELIVERY SCREENIE:

Items 1 through 3 shall be delivered within 120 days from the date of Contractor's acceptance of this Task Order No. 1.

SICURITY:

The work to be performed and the items to be furnished under this Task Order No. 1 are UNCLASSIVIED.

In the event any question may erice during the preliminary phoses of the work and/or research concerning the security of the technical aspects, i.e., security elaccification of various component purbs and/or related reports consected thereto, the technical representative of the Contracting Officer is authorised to furnish security guidance during this interim period.

CONFIDENTIAL

25X1

This is only to be considered an authorized expedient and efficient means of resolving <u>technical</u> security problems by the technical representative of the Contracting Officer on the spot and is not to be construct as a univer of the Contractor's responsibility to request formal written notification and/or authorization from the Contracting Officer prior to effecting any changes in <u>over-all</u> security classification of the contractor's Security Requirements, as agreed.

The association of the sponsor with the work being produced under this Test Order is elementical SECRET. This elementical information will be divulged only on a seed-to-know basis and then only to those who have been enthorized in writing by this Covernment component to have assess to classified information.

Correspondence originated by the Contractor and/or other data to be submitted hereunder, the contents of which contains elemnified information or refers to the number of this Tank Order and/or Contract, the name and/or address of the Contracting Officer shall be stamped by you with the classification of SECHET. Unless the first paragraph of this Security Article specifies the program, work or items hereunder are classified, all other correspondence and/or data, including reports, need not be classified.

HEPORTS:

Technical Progress Reports, a Final Report, manuals, drawings and similar data, as may be required under this Tank Order, shall be submitted at such times and in such format as may be specified by the technical representative of the Contracting Officer or may be as otherwise set forth in the "Scope of Vork" article of this Schedule.

SELFTED DESTRUCTIONS:

Any items to be delivered under this Tesk Order shall be delivered FOR destination to whatever location within the continental United States as may be later stipulated by the Contracting Officer or his technical representative.

All deliverable items, if any, shall be packaged and exacted, if applicable, in accordance with the Contractor's best downtic connercial practice or as further amplified by mutilliary specific instructions of the Contracting Officer or his technical representative.

CONFIDENTIAL

LESPECTION:

Inspection during the course of the Task Order, as well as the final inspection and acceptance of deliverable products, if any, hereunder shall be unde by the technical representative of the Contracting Officer. Final acceptance of items deliverable hereunder, if any, shall be unde after proper inspection at the PCB point designated in accordance with the stipulations of "Shipping Instructions" above.
